

Announcing: State-of-the-art user-friendly back-office solution for 50+ terminal Phone Card Sweepstakes System.

Atlanta, Georgia. October 12, 2010

Georgia based TITAN TOUCH SYSTEMS, INC. announced today their newly improved Titan Touch phone-card system, the:

Titan Touch Plus.

The Titan Touch Plus offers many of the features of its predecessor, "Plus" a whole lot more!

1. The ability to add 50+ terminals in a location has become a reality in the market, and the Titan Touch Plus uses the very latest technology to accomplish this!
2. Titan Touch Systems offers a seamless back-office solution which provides the tools necessary to make intelligent business decisions. It's easily navigated and accessible via the internet. Titan Touch Systems, Inc. will host your data, for a small fee, or you can have it hosted at a site of your choosing.
3. Points, accumulated on one terminal, can now be transferred to another without the need for printing additional PINs. Thereby, negating the need for repetitive ticket redemption at the counter each time a customer wishes to move from one terminal to the next.
4. Titan Touch Systems, Inc. offers two versions of the Titan Touch Plus: One that sells Calling Card PINs and one that issues credits without the sale of Calling Card PINs.
5. An attractive 15" touch screen, all-in-one computer, which replaces bulky peripheral equipment, not only eliminates a central bill acceptor, but also does away with the need for printers in each sweepstakes terminal.
6. The new system can also incorporate a wireless solution based on customer preference. Thus, eliminating difficult installations caused by the inability to route Ethernet cabling.
7. Along with easy-to-recharge Phone Time PIN numbers from sister company, "Titan Time", this menu-driven and user-friendly system offers detailed accounting reports and security features second-to-none.
8. Its sleek and attractive design has indeed captured the attention of distributor and operator alike. Additionally "Titan Time" phone time can be purchased, and is universally compatible with most existing PIN generator platforms on the market.

Titan Touch Systems, Inc. designed the "Titan Touch Plus" system to alleviate the existing issues with competitive products and become the new standard in the phone-time/sweepstakes arena.
